

Ok, you have 4 TV stations and 8 radio stations in a community. Each one provides traffic and weather reports. I don't see the NAB going after these stations. So what, may I ask is the difference of what XM Radio is providing vs local TV and radio stations? The answer is NONE!! I, along with others pay for this service. I don't understand why this should be an issue. The main issue is competition. This is a free enterprise market and if someone can do a better job, then that is what makes America great. It is also a problem with free speech and the 1st Amendment. XM Radio has a right and an obligation to it's listeners in providing the best music, and the best information it can. HR4026 should not be allowed to pass the House, let alone go to conference.
